

# MEWP Occupant Training Checklist

**The MEWP Operator has ensured that the occupant:**

- Understands the requirement to use fall protection and the location of fall protection anchors.
- Understands how their actions could affect stability.
- Instructed on the safe use of MEWP accessories they are assigned to use.
- Aware of the site-specific work procedures the occupants must follow related to the operation of the MEWP.
- Aware of all hazards related to the task at hand and their avoidance, to include any applicable site risk assessment.
- Has a general knowledge of the intended purpose and function of MEWP controls and safety-related items specified by the manufacturer, including emergency shut-down and lowering procedures, to the extent required to lower the MEWP safely to the ground/stowed position.
- Aware of the manufacturer's warnings and instructions.
